

## Chapter A Awareness of values Basic data

### Kapitel A Wertebewusstsein Basisdaten

| Freedom  |      |   | A1 The most important thing in life is to be free to decide for oneself.       |             |                 | A21 My parents restrict my freedom quite a lot.         |             |                 | A37 The society in which I live gives me a lot of freedom.     |             |                 | A28 Every country in the EU should be completely free to make its own decisions. |             |                 | A33 The development of the individual is more important than the common good.          |             |                 | A 4 Money is essential to be free.                  |             |                 | A55 To act in a moral way, I do not need to have a religion.        |             |                 |
|----------|------|---|--|-------------|-----------------|---|-------------|-----------------|--|-------------|-----------------|--|-------------|-----------------|--|-------------|-----------------|---|-------------|-----------------|---|-------------|-----------------|
|          |      |   | agree  | do not know | disagree        | agree   | do not know | disagree        | agree  | do not know | disagree        | agree  | do not know | disagree        | agree  | do not know | disagree        | agree   | do not know | disagree        | agree   | do not know | disagree        |
| Freiheit |      |   | A1 Das Wichtigste im Leben ist, dass man über sich völlig frei bestimmen kann. |             |                 | A21 Meine Eltern schränken meine Freiheit ziemlich ein. |             |                 | A37 Die Gesellschaft, in der ich lebe, gibt mir viel Freiheit. |             |                 | A28 Jedes Land in der EU sollte völlig frei über sich entscheiden.               |             |                 | A33 Meine freie Entfaltung ist mir wichtiger als für die Gleichheit aller einzutreten. |             |                 | A4 Geld ist die Voraussetzung für ein freies Leben. |             |                 | A55 Um moralisch zu handeln, brauche ich keinen religiösen Glauben. |             |                 |

| Pluralismus |      |   | A19 Eine Religion, die von sich behauptet, sie habe einen höheren Rang als andere, stört den Frieden. |             |                 | A17 Mehr als 4 oder 5 Parteien in einem Parlament behindern Entscheidungen mehr als sie nützen.          |             |                 | A36 Eine nationale Bildungspolitik ist besser als gemeinsame EU-Standards. |             |                 | A60 Das Fernsehen sollte durch Gebühren von jedem Benutzer bezahlt werden, damit es nicht von wenigen Privatgesellschaften abhängig wird. |             |                 | A38 Für den sozialen Frieden im Land ist es besser, wenn die Bevölkerung homogen ist und es nur wenige Ausländer gibt. |             |                 | A23 Eigentlich würden ein paar mehr Ausländer unser Leben bereichern, denn sie bringen auch neue Ideen mit. |             |                 | A69 Wenn das Fernsehen und die Presse nur von Privatunternehmern bezahlt werden, ist das für die Demokratie am besten. |             |                 |

| Tolerance |      |   | A45 There are clear principles of good and evil. These are valid for everyone everywhere.                        |             |                 | A47 It is a personal choice to wear religious symbols/ clothing.                                |             |                 | A16 It is a personal choice if Muslim students decide not to participate in sports or excursions for religious reasons.                          |             |                 | A12 If others spread themselves out in our neighbourhood, it might be necessary to use violence to show them who is boss.                           |             |                 | A44 Standards of learning are lowered in classes with many immigrants. |             |                 | A27 There is nothing wrong with imposing arranged marriages.                              |             |                 | A66 For me there is no higher value than the honour of my family. |             |                 |

| Justice       |      |   | A32 It is perfectly fair for a car mechanic in Romania to earn only a quarter of the wages that his French colleague receives.                  |             |                 | A14 If jobs are scarce, employers should take on workers from our own country and not foreigners.                        |             |                 | A35 I find consolation in the fact that after so much injustice on earth there will be compensation with justice in heaven. |             |                 | A26 Only the forces of the market can guarantee a fair distribution of goods.    |             |                 | A18 The unemployed should accept any work offered to them, or else their unemployment benefits should be stopped.                  |             |                 | A8 Women should be given the same wages for the same work as men.               |             |                 | A64 In my opinion, poor EU member states should be allowed to offer low taxes and financial help to attract industry to their country.                               |             |                 |
|---------------|------|---|---|-------------|-----------------|--|-------------|-----------------|---|-------------|-----------------|--|-------------|-----------------|--|-------------|-----------------|---|-------------|-----------------|--|-------------|-----------------|
|               |      |   | agree   | do not know | disagree        | agree  | do not know | disagree        | agree   | do not know | disagree        | agree  | do not know | disagree        | agree  | do not know | disagree        | agree   | do not know | disagree        | agree  | do not know | disagree        |
| Gerechtigkeit |      |   | A32 Es ist durchaus gerecht, wenn ein Automechaniker in Rumänien nur den vierten Teil des Lohns erhält, den sein französischer Kollege bekommt. |             |                 | A14 Wenn die Arbeitsplätze knapp sind, sollten die Unternehmer Arbeiter aus unserem Land einstellen und keine Ausländer. |             |                 | A35 Ich finde es tröstlich, dass es für so viel Unrecht auf Erden eine ausgleichende Gerechtigkeit im Himmel gibt.          |             |                 | A26 Nur die Kräfte des Marktes können eine gerechte Güterverteilung garantieren. |             |                 | A18 Arbeitslose sollen jede Arbeit machen, die ihnen angeboten wird, sonst muss man ihnen die Arbeitslosenunterstützung streichen. |             |                 | A8 Frauen sollen für gleiche Arbeit auch den gleichen Lohn wie Männer bekommen. |             |                 | A64 Ich hätte nichts dagegen, wenn arme EU-Mitgliedsländer Industriebetriebe dadurch anlocken, dass sie ihnen niedrige Steuern und finanzielle Starthilfen gewähren. |             |                 |

| Solidarity  |      |   | A51 I feel very close to members of my own religion, regardless of whether they are rich or poor, educated or uneducated, right or left-wing.   |             |                 | A24 The state should take more responsibility for the social security of every citizen.      |             |                 | A10 In sickness or in old age people should rely more on the family, as state help cannot be depended upon.                            |             |                 | A20 Solidarity with people of my own nationality is more important to me than it is with other people who also live here. |             |                 | A34 I cannot see no reason why I should give up part of my income out of solidarity with other European peoples.                         |             |                 | A29 If I had a job in a car factory in a country in eastern Europe, it would be all the same to me if jobs in the same firm were lost in Germany or Sweden.                                     |             |                 | A67 Rich EU countries should pay into a development fund to lift the standard of living in the poorer member states.  |             |                 |

| Solidarität |      |   | A51 Ich fühle mich den Mitgliedern meiner Religion sehr verbunden, egal ob reich oder arm, gebildet oder ungebildet, rechts oder links stehend. |             |                 | A24 Der Staat sollte mehr Verantwortung dafür übernehmen, dass jeder Bürger abgesichert ist. |             |                 | A10 Bei Krankheiten und Alter sollte man sich mehr auf die Familie stützen, denn auf staatliche Dienste kann man sich nicht verlassen. |             |                 | A20 Die Solidarität mit Menschen meiner Nationalität ist für mich wichtiger als mit Menschen, die hier sonst noch leben.  |             |                 | A34 Ich kann überhaupt nicht verstehen, warum ich aus Solidarität mit anderen Völkern Europas einen Teil meines Einkommens abgeben soll. |             |                 | A29 Wenn ich in einer Autofirma in den Ländern Mitteleuropas einen Arbeitsplatz hätte, wäre es mir egal, wenn in Deutschland oder Schweden in der gleichen Firma Arbeitsplätze abgebaut würden. |             |                 | A67 Reiche EU-Länder sollten den Lebensstandard in den ärmeren Mitgliedsländern dadurch anheben, dass sie in einen entsprechenden Entwicklungsfond einzahlen. |             |                 |

| Human rights   |      |   | A15 The open borders within the EU have brought us no advantages, only more criminals and smuggling of drugs and people.       |             |                 | A25 Freedom of movement in the EU is one of its best features.       |             |                 | A11 The EU is a threat to our democratic right to self-determination, if more and more decision-making takes place in Brussels. |             |                 | A41 In a global world the national state can no longer guarantee the rights of the individual.     |             |                 | A43 The quality of democracy can be seen in the freedom of opinion and of its press. |             |                 | A31 All monotheistic religions accept human rights without any restrictions.                 |             |                 | A65 I think it is correct that the interests of the people who put the capital into a company are at the top of the list when changes in the company must be made.                |             |                 |

| Menschenrechte |      |   | A15 Die offenen Grenzen innerhalb der EU haben uns nichts Gutes gebracht, nur mehr Kriminelle, Drogen- und Menschen-Schmuggel. |             |                 | A25 Die Freizügigkeit in der EU ist eine ihrer besten Eigenschaften. |             |                 | A11 Die EU bedroht unser demokratisches Recht auf Selbstbestimmung, wenn immer mehr Entscheidungen in Brüssel gefällt werden.   |             |                 | A41 In einer globalen Welt kann der Nationalstaat die Rechte des Einzelnen nicht mehr garantieren. |             |                 | A43 An der Presse- und Meinungsfreiheit erkennt man die Qualität einer Demokratie.   |             |                 | A31 Alle monotheistischen Religionen akzeptieren die Menschenrechte ohne jede Einschränkung. |             |                 | A65 Ich finde es richtig, wenn bei Unternehmensentscheidungen zuerst einmal die Interessen derer berücksichtigt werden, die das Kapital für das Unternehmen bereitgestellt haben. |             |                 |

| Homeland, Nation   |      |   | A56 In Cyprus, the Greek Cypriots and Turkish Cypriots follow the interests of their governments. I think this is the correct way to behave.         |             |                 | A57 The values that I learned at the place where I grew up influence the way I behave very much.    |             |                 | A58 The EU should wait until the Balkan countries first fix their problems with corruption, drug and people trafficking by themselves; then it can allow them to become EU members. |             |                 | A63 Today, it makes no sense to fight for this or that piece of land in a country to say: „It is mine!"; in our globalised world, we need totally different values. |             |                 | A68 My homeland is not so important to me when I know that all the people around me think in the same way as myself. |             |                 | A54 My national identity is more important to me than European citizenship.        |             |                 |

| Heimatland, Nation |      |   | A56 Im türkischen und griechischen Teil Zyperns folgen die Menschen den Interessen ihrer jeweiligen Regierungen. Ich finde, das ist auch richtig so. |             |                 | A57 Werte eines Ortes, an dem ich aufgewachsen bin, haben auf mein Verhalten einen großen Einfluss. |             |                 | A58 Die EU sollte die Balkanländer erst dann als Mitgliedsländer aufnehmen, wenn diese vorher ihre Probleme mit der Korruption, dem Drogen- und Menschenhandel selbst gelöst haben. |             |                 | A63 Es hat heutzutage keinen Sinn mehr, für den Besitz bestimmter Gebiete zu kämpfen, da in einer globalisierten Welt ganz andere Werte zählen als Landbesitz.      |             |                 | A68 Meine Heimat ist mir nicht so wichtig, wenn ich unter Menschen lebe, die ähnlich wie ich denken.                 |             |                 | A54 Meine nationale Identität ist mir wichtiger als eine europäische Bürgerschaft. |             |                 |
